

HYPERION PLANNING:

Oracle Hyperion Planning is one among the centralized, Web-based planning, budgeting and forecasting Tool that deploys Oracle's Essbase because the data storage and Calculation device that drives integrated, collaborative, event-based planning processes throughout the enterprise for a good range of monetary and operational needs. With this Tool business managers can accumulate planning processes by arranging plans that are developed across the organization along familiar capacities like cost centers, business entities, and charts of accounts.

Hyperion Planning may be a budgeting and forecasting application from Oracle formerly owned by Hyperion Solutions Corporation which integrates financial and operational planning processes and improves business predictability. It provides an in-depth Analysis on business operations and its related impact on financials, by tightly coupling financial and operational planning models. Using this you'll meet your immediate financial planning needs while enabling a platform for future cross-functional expansion and automatic process integration.
